F. No. Stds/Nutra-IEM/FSSAI-2016 (Pt. F1)
Food Safety and Standards Authority of India
(A Statutory Authority under the Ministry of Health and Family Welfare, Govt. of India)
FDA Bhawan, Kotla Road, New Delhi-110 002

Dated, the 02nd Nov, 2016
~~October~~

Subject: Direction under Section 16(5) of Food Safety and Standards Act, 2006 regarding import of specialty foods for IEM disorders - reg.

1. Inborn Errors of Metabolism (IEM) and Hypoallergenic conditions are special medical conditions which requires specialty foods. Such specialty foods are not readily available in the country. The hospitals need these specialty foods for the management of infants and children suffering from such conditions.
2. These specialty foods are globally available. However, in the absence of Standards for such foods, it is difficult to import them into India. FSSAI has been receiving representations from various organizations for allowing these foods in the country.
3. And whereas, taking these issues into consideration, the Scientific Panel of FSSAI on "Functional Foods, Nutraceuticals, Dietetic Products and Other Similar Products" has initiated work on for setting the Standards for these products. However, it is likely to take long time to finalize these Standards in view of the complexity of this subject. Taking note of the seriousness of the issue, the Scientific Panel has, therefore, recommended that import of these products may be permitted by FSSAI for two years or till their Standards are developed and notified, whichever is earlier. The Panel, after careful consideration, recommended for allowing the import of foods for fifteen "Inborn Errors of Metabolism" and two Hypoallergenic conditions as per the Annexure.
4. It has been decided to allow the import of foods for special medical purposes, as listed in the Annexure to this Order, for a period of two years or till their Standards are developed and notified, whichever is earlier, under the following conditions:
 - a. The importing firm would submit to FSSAI well in advance, all the necessary documents related to the composition, label and claims for the product they intend to import. FSSAI after due examination, would allow the import of such foods on a case to case basis for a period of two years from the date of this Order or till their Standards are developed and notified, whichever is earlier. Once a particular composition, label & claims is permitted by FSSAI for import, future consignments strictly adhering to the requirements can be imported on the basis of this one time permission.
 - b. The labels on these foods shall clearly mention the medical conditions for which they have to be used.
 - c. The importer/manufacture of such foods shall ensure that they are consumed only under supervision of health care professionals.

5. The above conditions shall also apply to domestically produced specialty food products for which FSSAI shall grant permission after due examination.

Rakesh Ghandra Sharma
Director (Imports)

Enclosure: as above

To
