## Greater quality checks soon on milk, edible oil, honey, meat & poultry, says FSSAI new CEO

IAS officer Arun Singhal details the new ways of testing and new regulations at the food regulator, and the reforms that are already underway.

### **FSSAI CEO Arun Singhal**

**New Delhi:** The Narendra Modi government plans to increase the quality checks on milk, edible oil, honey, meat and poultry through the country's apex food regulator, Food Safety and Standards Authority of India (FSSAI), according to the body's new CEO, Arun Singhal.

Singhal, a 1987 batch IAS officer of the Uttar Pradesh cadre, was appointed to the FSSAI in May as part of a bureaucratic reshuffle by the Modi government, having earlier served as special secretary in the Ministry of Health and Family Welfare. The FSSAI falls within the ambit of the same ministry.

In his first interview since his appointment, Singhal told ThePrint that apart from checks, FSSAI will identify more food products that are susceptible to adulteration, and identify the hotspots where this adulteration takes place.

“Five food products which are susceptible to adulteration are now under the strict vigilance of the FSSAI. These products are milk, edible oil, honey, meat and poultry. More products will be added to the high-risk food items,” said Singhal.

“We will increase the scope of market surveillance to identify hot-spot areas of adulteration and conduct national-level surveys for milk, vegetable oils and all other high risk commodities,” he said, adding that the timeline for these surveys has not yet been decided.

#### New ways of testing, new regulations

Singhal said the FSSAI is focusing on periodic inspections and third-party audits, and conducting focussed checks to ensure safety and quality of food products available in the market. “We have approved 30 rapid food testing kits and devices to ensure faster, better and cheaper real-time testing of food at the field level. With this, samples will not be required to be sent to the laboratories every time for testing,” he said. Also, to increase the access of imported food items in India, FSSAI is set to come out with new regulations for imported food products. Pre-packaged food — such as frozen food, which is packed in a box, can or any other container — is a focus area.

“Under the new provisions, pre-packaged food items can be moved out of ports provisionally, pending test reports. Many more labelling defects can be rectified at the ports, and earlier delays in sampling would be significantly brought down. All these changes would help to facilitate imports,” Singhal said.

#### **Regulatory reforms underway**

Singhal also said core work on various regulatory reforms is underway. For example, on ‘ease of doing business’, the FSSAI is simplifying the processing of applications for licencing and registration.

“IT-enabled e-services are being developed for improvement in existing portals of licencing and registration, imports and testing mechanisms by making them more user-friendly for food businesses. To build the culture of self-compliance, FSSAI has created an online ecosystem for training of food handlers,” the IAS officer said.

The FSSAI is also in the process of strengthening its import clearance system.

“The idea is to ensure efficient and effective import control, post clearance surveillance, robust monitoring and simultaneously reducing the transaction time, cost and physical interface with importers,” Singhal said.

The FSSAI also plans to focus on improving infrastructure, including “strengthening of food testing laboratories, development of new National Food Laboratories (NFLs) at Chennai and Mumbai, along with investment in training and capacity building of lab personnel and field staff”, he added.

### **News media is in a crisis & only you can fix it**

You are reading this because you value good, intelligent and objective journalism. We thank you for your time and your trust.

You also know that the news media is facing an unprecedented crisis. It is likely that you are also hearing of the brutal layoffs and pay-cuts hitting the industry. There are many reasons why the media’s economics is broken. But a big one is that good people are not yet paying enough for good journalism.

We have a newsroom filled with talented young reporters. We also have the country’s most robust editing and fact-checking team, finest news photographers and video professionals. We are building India’s most ambitious and energetic news platform. And we aren’t even three yet.

At ThePrint, we invest in quality journalists. We pay them fairly and on time even in this difficult period. As you may have noticed, we do not flinch from spending whatever it takes to make sure our reporters reach where the story is. Our stellar coronavirus coverage is a good example. You can check some of it [here](#).

This comes with a sizable cost. For us to continue bringing quality journalism, we need readers like you to pay for it. Because the advertising market is broken too.

If you think we deserve your support, do join us in this endeavour to strengthen fair, free, courageous, and questioning journalism, please click on the link below. Your support will define our journalism, and ThePrint's future. It will take just a few seconds of your time.
