Emerging Challenges in Food Safety

Webinar Series | Aug-Dec 2022

Analytical challenges in food safety analysis are ever present, with new contaminants being found regularly which require novel analytical solutions. Today laboratories are tasked with screening hundreds of contaminants in a variety of food matrices. This webinar series will highlight emerging challenges in food safety analysis and illustrate ways of tackling them in the most efficient way.

Do you have queries about these topics? There will be time to ask our experts at the end of the session. Can't make this time, register anyway and we will send you links to the recorded sessions automatically
